Ehsan Yaqoob

Mobile Developer (iOS / Flutter)

+92-312-651-4491 | ehsanyaqoob07@gmail.com | linkedin.com/in/ehsany | github.com/ehsanyaqoob | ehsanyaqoob.vercel.app/

Mobile Developer with 2+ years shipping production apps across Flutter and native iOS - from a government enforcement system deployed to 500+ field officers to two solo-built consumer apps live on the App Store and Play Store. Specializes in offline-first architecture, Supabase/Firebase-backed sync, and CI/CD via Fastlane and GitHub Actions. Currently deepening native iOS expertise (SwiftUI, SwiftData) while transitioning toward full-stack iOS development.

EXPERIENCE

National Police Foundation **Islamabad, Pakistan**
Mobile Developer (iOS & Flutter) — Flutter, GetX, Firebase, REST APIs Apr 2024 – Present

- Build and maintain the Digital Sergeant E-Challan system, deployed to 500+ ITP officers in production.
- Integrate ML Kit OCR for real-time license plate scanning and REST APIs for live violation reporting and data sync.
- Cut OTA update resolution time from 5 minutes to 20–40 seconds by optimizing the Shorebird intranet auto-update pipeline.
- Maintain CI/CD pipeline using GitHub Actions and Fastlane for automated builds and releases.
- Independently built two fintech-style SPA websites (Next.js) for NPF, including Stripe/PayPal checkout UI integration, plus an internal event platform for the agricultural department.
- Developing a cross-platform (iOS/Android) wallet app for fintech-style transactions, currently in staging.

Logixsy Tech **Islamabad, Pakistan**
Flutter Developer Intern — Dart, Bloc, Provider, Firebase Jul 2023 – Sep 2023

- Contributed to production Flutter apps under senior developer guidance, working with Bloc, Provider for state management.
- Built and debugged Firebase-backed data flows, resolving rendering and performance issues.
- Wrote tests and handled Play Store deployment for apps built during the internship.

PROJECTS

Niyyah — Swift, SwiftUI, SwiftData, Supabase 2026

- Native iOS Salah tracker with GPS-based prayer times, streak tracking, and monthly heatmap; architected offline-first with Supabase RLS, a dirty-flag sync pattern, and an enum-driven navigation state machine.
- Shipped solo end-to-end to the App Store — WidgetKit home screen widget, local notifications, resolving three App Review rejection cycles to reach production approval.

Mizan — Flutter, Riverpod, Hive, Supabase 2026

- Freelancer finance tracker with PKR/USD conversion, FBR tax calculation engine, and PDF export, offline-first with Hive, synced to Supabase.
- Designed, developed, and shipped solo to both the App Store and Play Store.

Digital Sergeant — Flutter, GetX, ML Kit OCR, Firebase, REST APIs 2024

- Government-grade E-Challan enforcement system with real-time license plate scanning via ML Kit OCR and live violation reporting synced through REST APIs, offline-first with Firebase.
- Sole mobile developer, deployed and actively maintained in live production for 500+ Islamabad Traffic Police officers.

Padel App — Flutter, Provider, Google Maps Dec 2025 – Present

- Building the Flutter mobile client for a real-time court booking platform - slot availability, in-app payments, Google Maps-based court discovery, and role-based UI for players vs. club owners.
- Collaborating with a backend engineer on Laravel API integration, in active development targeting Play Store release.

TECHNICAL SKILLS

Languages: Swift, Dart, JavaScript/TypeScript (familiar)
Mobile: SwiftUI, SwiftData, UIKit, WidgetKit, Combine, Swift Concurrency | Riverpod, Bloc, GetX, Provider, Hive
Architecture & Backend: Clean Architecture, MVVM, offline-first sync, Supabase (Auth/RLS/Postgres), Firebase, REST APIs
DevOps: Fastlane, GitHub Actions, Shorebird, App Store Connect, TestFlight, Play Console
Other: Git, ML Kit OCR, Google Maps SDK, Stripe/PayPal

EDUCATION

PMAS Arid Agriculture University **Islamabad, Pakistan**
B.S. in Computer Science 2022 – 2026
Coursework: Data Structures & Algorithms, Software Engineering, Mobile Application Development, Human Computer Interaction, Computer Networks, Operating Systems, Artificial Intelligence, System Design
