Ehsan Yaqoob

Mobile Developer (Flutter)

+92-312-651-4491 | ehsanyaqoob07@gmail.com | linkedin.com/in/ehsany | github.com/ehsanyaqoob | ehsanyaqoob.com

Flutter developer since 2023, shipping production apps from a government enforcement system used daily by 500+ field officers to solo-built consumer apps on the App Store and Play Store. Strong in offline-first architecture, Riverpod, Bloc and GetX state management, REST API integration, Supabase and Firebase sync, and CI/CD with Fastlane and GitHub Actions. Owns features end-to-end: design handoff, implementation, release and post-launch fixes.

EXPERIENCE

National Police Foundation — **Islamabad, Pakistan**
Mobile Developer (iOS & Flutter) — Apr 2024 – Present

- Sole mobile developer on Digital Sergeant, the E-Challan system in production with 500+ Islamabad Traffic Police officers.
- Integrated ML Kit OCR for real-time license plate scanning and REST APIs for live violation reporting and data sync, with offline-first handling for poor connectivity.
- Cut over-the-air (OTA) update time from 5 minutes to 20–40 seconds by optimizing the Shorebird auto-update pipeline.
- Own CI/CD with GitHub Actions and Fastlane for automated builds and releases.
- Building a cross-platform (iOS and Android) fintech-style wallet app, currently in staging.
- Joined as an intern in Apr 2024 and moved to full-time in Jul 2024.

Logixsy Tech — **Islamabad, Pakistan**
Flutter Developer Intern — Jul 2023 – Sep 2023

- Built features for an investment app, a ship offloading app and a trading app using Bloc and Provider.
- Built and debugged Firebase-backed data flows, fixing rendering and performance issues.
- Wrote tests and handled Play Store deployment.

PROJECTS

Digital Sergeant — Flutter, GetX, ML Kit OCR, Firebase, REST APIs — 2024 – Present

- Built on Clean Architecture, with separate presentation, domain and data layers and offline data queuing.
- GPS-tagged violation tracking and role-based access control for officers.

Mizan — Flutter, Riverpod, Hive, Supabase — Live on the App Store and Play Store — 2026

- Finance tracker for freelancers: PKR/USD conversion, FBR tax calculation engine and PDF export. Offline-first with Hive, synced to Supabase.
- Designed, built and shipped solo.

Padel App — Flutter, Provider, Google Maps, Laravel API, Next.js — Dec 2025 – Present

- Building the Flutter mobile client for a real-time court booking platform: slot availability, in-app payments, Google Maps-based court discovery and role-based UI for players and club owners.
- Next.js admin dashboard (TanStack Query, shadcn/ui) with owner and admin portals, integrated with a Laravel backend alongside a backend engineer.

Native iOS — Swift, SwiftUI — 2026

- Tally (expense tracker) and Niyyah (prayer tracker), both live on the App Store. Details at ehsanyaqoob.com.

TECHNICAL SKILLS

Flutter/Dart: Flutter, Dart, Riverpod, Bloc, GetX, Provider, Hive, Clean Architecture, MVVM, offline-first sync, REST APIs, Google Maps SDK
Testing: Unit tests, widget tests
Backend/Data: Supabase (Auth, RLS, Postgres), Firebase, API integration, Next.js, JavaScript/TypeScript (familiar)
Release/DevOps: Fastlane, GitHub Actions, Shorebird, App Store Connect, TestFlight, Play Console
Also: Android, Android Studio, Git, Swift, SwiftUI, SwiftData, WidgetKit

EDUCATION

PMAS Arid Agriculture University — **Islamabad, Pakistan**
B.S. in Computer Science — 2021 – 2025
