iOS developer with two native SwiftUI apps live on the App Store (Tally and Niyyah), built solo from architecture to release. Mobile developer since 2023, including a government system used daily by 500+ officers. Works in Swift, SwiftUI, SwiftData, WidgetKit, App Intents and Live Activities, with offline-first sync and CI/CD through Fastlane and GitHub Actions. Also builds cross-platform apps in Flutter.

PROJECTS

Tally: Log Expense — Swift, SwiftUI, SwiftData, App Intents, WidgetKit, ActivityKit — Live on the App Store 2026

- Expense tracker built around Back Tap: tap the phone twice and log an expense through a custom Shortcut and a LiveActivityIntent, with no app launch.
- App, widget and Live Activity share one SwiftData store through an App Group, with a code-based light and dark design system shared across targets.
- Multi-currency, iOS 17+, free with no paid tier. Tested on physical hardware and shipped solo from design to the App Store.

Niyyah: Daily Prayer Tracker — Swift, SwiftUI, SwiftData, Supabase, CoreLocation — Live on the App Store 2026

- Offline-first prayer tracker with GPS-based prayer times, streaks, a monthly heatmap and a Qibla compass with haptic feedback.
- Architected sync with Supabase RLS, a dirty-flag sync pattern and an enum-driven navigation state machine.
- Rebuilt notification scheduling as a 5-day rolling window with DateComponents-anchored triggers and a scenePhase top-up, replacing a fragile midnight reschedule.
- WidgetKit home screen widget and local notifications. Worked through App Review feedback to approval and ship regular updates.

Mizan — Flutter, Riverpod, Hive, Supabase — Live on the App Store and Play Store 2026

- Cross-platform finance tracker for freelancers: PKR/USD conversion, FBR tax calculation engine and PDF export. Offline-first with Hive, synced to Supabase.
- Designed, built and shipped solo.

EXPERIENCE

National Police Foundation **Islamabad, Pakistan**
Mobile Developer (iOS & Flutter) Apr 2024 – Present

- Building a native iOS app for an NPF showroom partner.
- Sole mobile developer on Digital Sergeant, the Flutter E-Challan system in production with 500+ ITP.
- Integrated ML Kit OCR for real-time license plate scanning and REST APIs for live violation reporting and data sync.
- Cut over-the-air (OTA) update time from 5 minutes to 20–40 seconds by optimizing the Shorebird auto-update pipeline.
- Own CI/CD with GitHub Actions and Fastlane, plus App Store Connect and TestFlight releases.
- Building a cross-platform fintech-style wallet app, currently in staging.
- Joined as an intern in Apr 2024 and moved to full-time in Jul 2024.

Logixsy Tech **Islamabad, Pakistan**
Flutter Developer Intern Jul 2023 – Sep 2023

- Built features for an investment app, a ship offloading app and a trading app using Bloc and Provider.
- Built and debugged Firebase-backed data flows, fixing rendering and performance issues.
- Wrote tests and handled Play Store deployment.

TECHNICAL SKILLS

Native iOS: Swift, SwiftUI, SwiftData, Core Data, UIKit, WidgetKit, App Intents, ActivityKit (Live Activities), Combine, Swift Concurrency, CoreLocation, local notifications
Tools and Testing: Xcode, Instruments, XCTest, Git
Architecture: MVVM, Clean Architecture, offline-first sync, design systems, App Group shared storage
Backend/Data: Supabase (Auth, RLS, Postgres), Firebase, REST APIs
Release: App Store Connect, TestFlight, App Review, Fastlane, GitHub Actions
Cross-Platform: Flutter, Dart, Riverpod, Bloc, GetX, Shorebird

EDUCATION

PMAS Arid Agriculture University **Islamabad, Pakistan**
B.S. in Computer Science 2021 – 2025
