Ehsan Yaqoob

Mobile Developer (Flutter iOS)

+92-312-651-4491 | ehsanyaqoob07@gmail.com | linkedin.com/in/ehsany | github.com/ehsanyaqoob | ehsanyaqoob.vercel.app/

Flutter developer with 3+ years shipping production apps, from a government enforcement system used daily by 500+ field officers to solo-built consumer apps on the App Store and Play Store. Strong in offline-first architecture, Riverpod/Bloc/GetX state management, REST API integration, Supabase/Firebase sync, and CI/CD with Fastlane and GitHub Actions. I own features end-to-end, design handoff, implementation, release, and post-launch fixes.

EXPERIENCE

National Police Foundation **Islamabad, Pakistan**
Mobile Developer (Flutter — iOS) Apr 2024 – Present (intern Apr–Jun 2024, full-time since Jul 2024)

- Sole mobile developer on Digital Sergeant, the E-Challan system in production with 500+ Islamabad Traffic Police officers.
- Integrated ML Kit OCR for real-time license plate scanning and REST APIs for live violation reporting and data sync, with offline-first handling for poor connectivity.
- Cut OTA update resolution time from 5 minutes to 20–40 seconds by optimizing the Shorebird auto-update pipeline.
- Own CI/CD with GitHub Actions and Fastlane for automated builds and releases.
- Building a cross-platform (iOS/Android) fintech-style wallet app, currently in staging.

Logixsy Tech **Islamabad, Pakistan**
Flutter Developer Intern Jul 2023 – Sep 2023

- Built features for an investment app, a ship offloading app, and a trading app using Bloc and Provider.
- Built and debugged Firebase-backed data flows, fixing rendering and performance issues.
- Wrote tests and handled Play Store deployment.

PROJECTS

Digital Sergeant — Flutter, GetX, ML Kit OCR, Firebase, REST APIs 2024

- Government-grade E-Challan enforcement system with real-time license plate scanning via ML Kit OCR and live violation reporting synced through REST APIs, offline-first with Firebase.
- Sole mobile developer, deployed and actively maintained in live production for 500+ Islamabad Traffic Police officers.

Mizan — Flutter, Riverpod, Hive, Supabase 2026

- Finance tracker for freelancers: PKR/USD conversion, FBR tax calculation engine, PDF export. Offline-first with Hive, synced to Supabase.
- Designed, built, and shipped to both the App Store and Play Store.

Padel App — Flutter, Provider, Google Maps, Laravel API, Next.js Dec 2025 – Present

- Building the Flutter mobile client for a real-time court booking platform - slot availability, in-app payments, Google Maps-based court discovery, role-based UI for players and club owners.
- Next.js admin dashboard (TanStack Query, shadcn/ui) with owner/admin portals. Integrated with a Laravel backend alongside a backend engineer.

Native iOS (SwiftUI) 2026

- Niyyah (prayer tracker) and Tally (expense tracker), both live on the App Store. Details on request or at ehsanyaqoob.vercel.app.
- Shipped solo end-to-end to the App Store — WidgetKit home screen widget, local notifications, resolving three App Review rejection cycles to reach production approval.

TECHNICAL SKILLS

Flutter/Dart: Riverpod, Bloc, GetX, Provider, Hive, Clean Architecture, MVVM, offline-first sync, REST APIs, Google Maps SDK
Backend/Data: Supabase (Auth, RLS, Postgres), Firebase, API integration, Next.js, JavaScript/TypeScript (familiar)
Release/DevOps: Fastlane, GitHub Actions, Shorebird, App Store Connect, TestFlight, Play Console
Also: Swift, SwiftUI, SwiftData, WidgetKit, Git, Stripe/PayPal UI integration

EDUCATION

PMAS Arid Agriculture University **Islamabad, Pakistan**
B.S. in Computer Science 2021 – 2025
Coursework: Data Structures & Algorithms, Software Engineering, Mobile Application Development, Human Computer Interaction, Computer Networks, Operating Systems, Artificial Intelligence, System Design
