iOS developer who ships. Two native SwiftUI apps live on the App Store (Niyyah and Tally), built solo from architecture to App Review, plus 3+ years of production mobile work including a government system used daily by 500+ officers. Deep in Swift, SwiftUI, SwiftData, WidgetKit, App Intents and Live Activities, with offline-first sync, CI/CD via Fastlane and GitHub Actions, and a track record of getting through App Review. Also fluent in Flutter for cross-platform work.

PROJECTS

Tally: Log Expense — Swift, SwiftUI, SwiftData, App Intents, WidgetKit, ActivityKit — Live on the App Store 2026

- Expense tracker built around Back Tap: tap the phone twice, log an expense through a custom Shortcut and a LiveActivityIntent, no app launch needed.
- App, widget and Live Activity share one SwiftData store through an App Group, with a code-based light/dark design system shared across both targets.
- Multi-currency, iOS 17+, free with no paid tier. Tested on physical hardware; shipped solo from design to App Store.

Niyyah: Daily Prayer Tracker — Swift, SwiftUI, SwiftData, Supabase, CoreLocation — Live on the App Store 2026

- Offline-first prayer tracker with GPS-based prayer times, streaks, monthly heatmap and a Qibla compass with haptic feedback.
- Architected sync with Supabase RLS, a dirty-flag sync pattern and an enum-driven navigation state machine.
- Rebuilt notification scheduling as a 5-day rolling window with DateComponents-anchored triggers and a scenePhase top-up, replacing a fragile midnight reschedule.
- WidgetKit home screen widget and local notifications. Resolved three App Review rejection cycles to reach approval. Shipping regular updates.

Mizan — Flutter, Riverpod, Hive, Supabase 2026

- Finance tracker for freelancers: PKR/USD conversion, FBR tax calculation engine, PDF export. Offline-first with Hive, synced to Supabase.
- Designed, built, and shipped to both the App Store and Play Store.

EXPERIENCE

National Police Foundation **Islamabad, Pakistan**
Mobile Developer (Flutter — iOS) Apr 2024 – Present (intern Apr–Jun 2024, full-time since Jul 2024)

- Own end-to-end iOS and Flutter development for Digital Sergeant, the E-Challan system in production with 500+ Islamabad Traffic Police officers.
- Integrated ML Kit OCR for real-time license plate scanning and REST APIs for live violation reporting and data sync.
- Cut OTA update resolution time from 5 minutes to 20–40 seconds by optimizing the Shorebird auto-update pipeline.
- Own CI/CD with GitHub Actions and Fastlane, plus App Store Connect and TestFlight releases.
- Building a native iOS app for an NPF showroom partner and a cross-platform fintech-style wallet app (in staging).

Logixsy Tech **Islamabad, Pakistan**
Flutter Developer Intern Jul 2023 – Sep 2023

- Built features for an investment app, a ship offloading app, and a trading app using Bloc and Provider.
- Built and debugged Firebase-backed data flows, fixing rendering and performance issues.
- Wrote tests and handled Play Store deployment.

TECHNICAL SKILLS

Native iOS: Swift, SwiftUI, SwiftData, UIKit, WidgetKit, App Intents, ActivityKit (Live Activities), Combine, Swift Concurrency, CoreLocation, local notifications
Architecture: MVVM, Clean Architecture, offline-first sync, design systems, App Group shared storage
Backend/Data: Supabase (Auth, RLS, Postgres), Firebase, REST APIs
Release: App Store Connect, TestFlight, App Review, Fastlane, GitHub Actions
Cross-Platform: Flutter, Dart, Riverpod, Bloc, GetX, Shorebird

EDUCATION

PMAS Arid Agriculture University **Islamabad, Pakistan**
B.S. in Computer Science 2021 – 2025
