

Ehsan Yaqoob

Flutter App Developer

+92-312-651-4491 | ehsanyaqoob07@gmail.com | linkedin.com/in/ehsany | github.com/ehsanyaqoob | ehsanyaqoob.vercel.app/

Mobile App Developer with 3+ years of experience specializing in Flutter. Expert in defining Clean Architecture, selecting state management strategies, integrating RESTful APIs, Firebase services, and driving measurable performance improvements. Proven ability to design CI/CD pipelines using Fastlane and GitHub Actions, enabling predictable releases and maintainable production code. Currently expanding into native iOS development with Swift and SwiftUI.

EDUCATION

PMAS Arid Agriculture University · B.S. in Computer Science · Graduated · 2025

Coursework: Data Structures & Algorithms, Software Engineering, Operating Systems, Computer Networks, AI

Member: Aridian Array Society, Member of ARID CS Club, The Code Society of CS at ARID (2024/25)

TECHNICAL SKILLS

Programming/Core: Dart, Provider, Riverpod, Bloc, Clean Architecture, Firebase, REST APIs, Swift & SwiftUI (in progress)

Frameworks/Tools: Flutter, iOS/Android Development, Xcode, VS Code, Android studio, Git, Postman,

EXPERIENCE

National Police Foundation

Islamabad, Pakistan

Mobile App Developer — Flutter, GetX, Firebase, REST APIs

Apr 2024 – Present

- Developed and maintained E-Challan (Digital Sergeant) mobile application using Flutter and GetX, supporting 500+ active field users in a production government environment.
- Implemented real-time camera scanning with ML Kit OCR and Firebase integration for live violation reporting and data synchronization.
- Optimized data synchronization and network latency through scalable Firebase and REST API architecture with local caching.
- Contributed to CI/CD pipeline using GitHub Actions and Shorebird to enable faster deployments and application updates.

Tech Solutions

Islamabad, Pakistan

Mobile Developer — Flutter, GetX, Fastlane

Dec 2023 – Mar 2024

- Developed key features for Funica (furniture e-commerce) and E-Wallet applications using Flutter, resulting in improved user engagement.
- Implemented cart, checkout, and transaction flows with reusable components and clean state management.
- Collaborated with UI/UX team to deliver responsive and intuitive interfaces for better user experience.
- Automated build and deployment workflows using Fastlane in Agile environment to reduce manual errors.

Logixsy Tech

Islamabad, Pakistan

Flutter Developer — Dart, Bloc, Provider, Firebase

Jan 2023 – Oct 2023

- Developed production-ready Flutter applications serving several thousand users with Bloc and Provider for state management.
- Implemented Firebase integration for real-time data synchronization across devices.
- Optimized app performance, memory usage, and launch time through efficient Dart coding practices.
- Participated in code reviews and debugging sessions to improve overall code quality and reduce production bugs.

PROJECTS

Padel App — Flutter, Provider, Google Maps, Custom Backend

Dec 2025 – March 2026

- Real-time padel court booking platform with slot availability and in-app payments
- Built using **Flutter**, **Provider**, **Google Maps** and **custom backend**
- Finalizing for production release on Google Play Store

OnePay (Digital Wallet App) — Flutter, Provider, REST APIs, Secure Storage

Aug 2025 – Present

- Secure digital wallet for balance management, transactions and history
- Implemented **Flutter**, **Provider** state management and **REST APIs**
- Added encrypted **secure storage** for real-time synchronization

Digital Sergeant App — Flutter, GetX, ML Kit OCR, Firebase

Jul 2024 – Jan 2025

- Real-time E-Challan enforcement system for Islamabad Traffic Police
- Integrated **Flutter**, **GetX**, **ML Kit OCR**, **Firebase** and REST APIs
- Used by 500+ field officers with live camera scanning and data syncing
